GeoThai

Open data for every place in Thailand, checked.

The logo, the colors, the type and the rules for using them.

A map in blue looks like every other map brand.

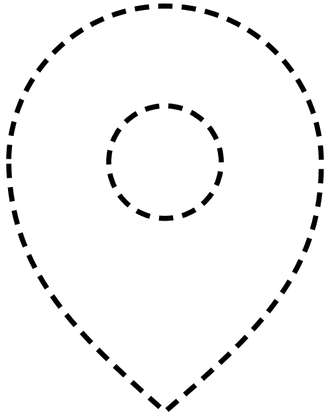

The old logo was the outline of Thailand in blue. Most map and geodata brands use a map, a globe or a pin in blue. The outline is hard to read at 16 px, and it says nothing about the name.

The G of Bai Jamjuree

The wordmark's own letter

+

A location pin

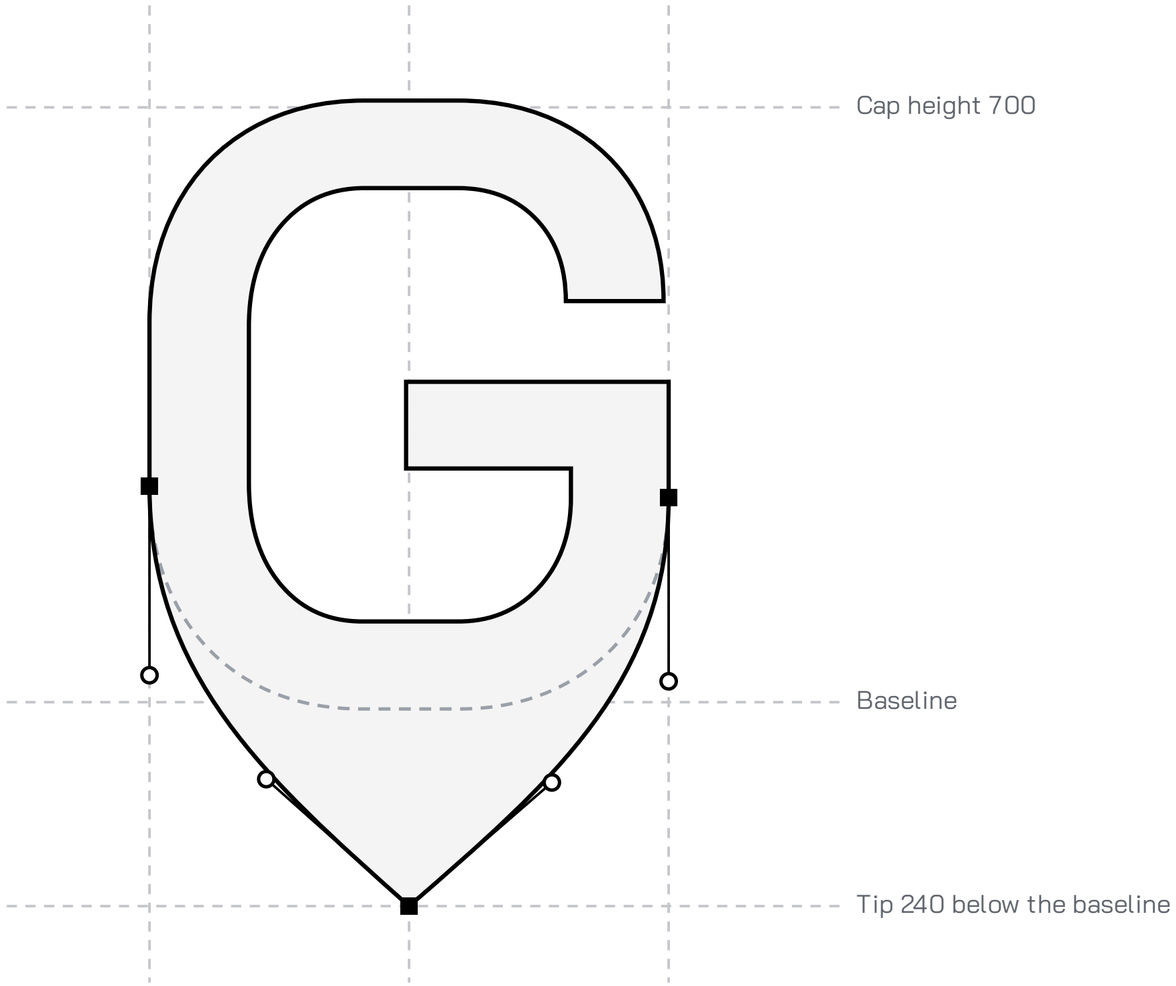

The common sign for a place

=

G-pin

The name and the place in one letter

One letter, two curves.

The head is the SemiBold G of the wordmark, unchanged. Its lower outer curve is replaced by two cubic Bézier sides that meet at the tip.

The tip sits 240 units below the baseline, on the centre line of the G. Each side leaves the G straight down, so the pin has no corners.

Horizontal

The default: headers, README, slides

Stacked

Square or narrow spaces

Symbol

Avatars, app icons, favicons

Wordmark

After the symbol already shows

Give it room.

H is the cap height of the wordmark. Keep 0.5 H free on every side. The G is 1.3 H tall and the gap to the wordmark is 0.6 H.

Smallest sizes on screen: horizontal 120 px wide, stacked 64 px wide, symbol 24 px tall. Below 24 px, use the small symbol with the longer tip.

Black

#000000
RGB 0 0 0
CMYK 0 0 0 100

White

#FFFFFF
RGB 255 255 255
CMYK 0 0 0 0

No accent color.

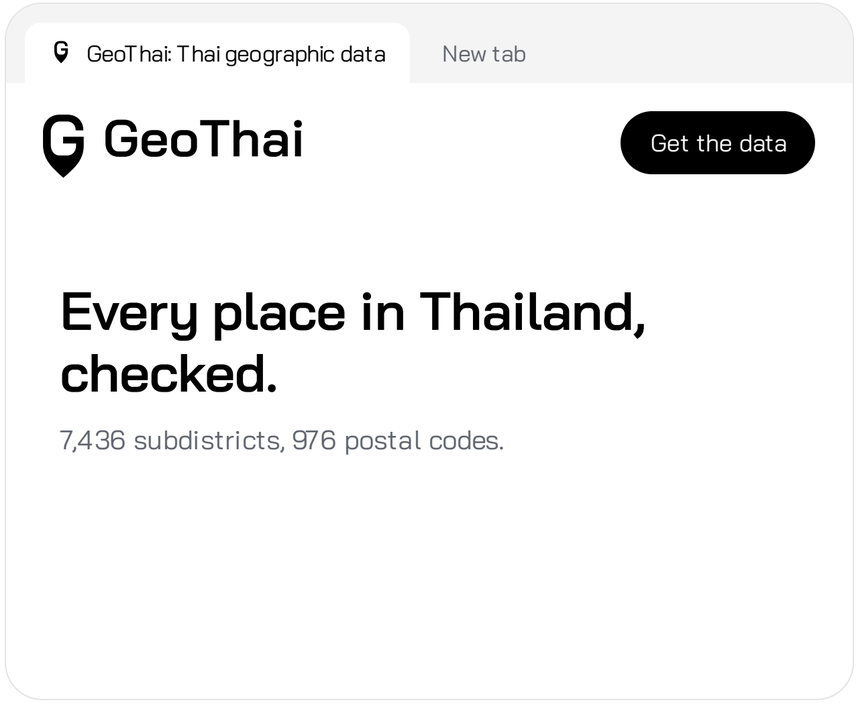

The shape of the G-pin carries the brand. We tested a red-brown. It sat close to the error red of developer tools, to Thai brands and to a common AI default. Black and white sit next to any product without a clash.

Bai Jamjuree

By Cadson Demak, under the SIL Open Font License. Thai and Latin in one family, so both scripts share one voice. Wordmark and headings in SemiBold, body text in Regular.
